#### Chart

## Added option to display symbol and interval watermark

Users can now display a watermark on the chart that indicates the main symbol and interval being plotted.

#### Enhanced the Advanced GET TJ Web study •

Users can now assign color, line style and line thickness individually to each level of the TJ Web study.

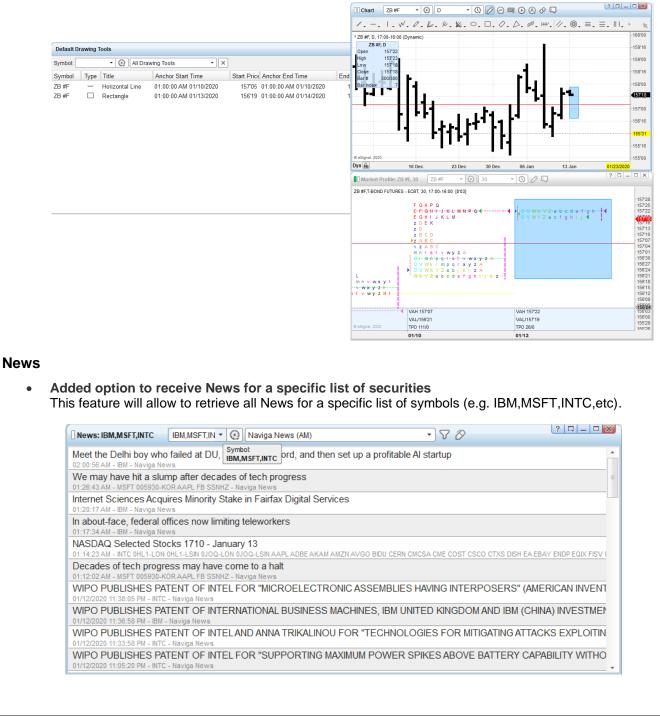

VersionDateeSignal 12.13January 2020

## Market Profile

• Added option to set a Drawing Tool as default for a symbol

This feature will allow a user to associate specific drawing tools on a Chart or Market Profile as defaults for the related symbol. Once a drawing tool is assigned as a default it will be drawn on any new chart or Market Profile for that symbol.

Users then have the option to view and manage all the defaults from within the Default Drawing Tools dialog that can be accessed in the Tools menu.

#### Trading

#### • Order Designer

This tool allows a user to pre-set specific orders and assign them to hotkeys and/or toolbar icons. The user can then execute these orders simply by typing the related hotkey and/or clicking the toolbar icon.

OUTLINE

Version Date January 2020

## **Other Enhancements and Fixes**

- Updated Options Analytix.
- Updated the News Reader window which now uses the Chromium browser thereby improving the overall
  performance and rendering of pages.
- Updated the EFS engine to SpiderMonkey version 70a.
- Fixed an issue where detached windows could be positioned incorrectly when duplicating pages.
- Fixed an issue in the Color Picker where RGB values could not be entered using the keyboard.
- Fixed an issue in the High/Low Channel built-in study where the Upper Band would not offset.
- Fixed an issue in the Trade Ideas app where dates could not be entered in the Use Historical Date dialog.
- Fixed an issue where expired options could not be charted.
- Fixed an issue where a chart could plot a Sunday overnight session incorrectly in some specific instances.
- Other minor enhancements and fixes.
